

$B \rightarrow h h h$ Analysis

(Chris Cormack on behalf of

John Back, QMUL)

- Unblinded BFs for 81.8 invfb
- BAD 505 - Version 3 has results (Chap 12)
- Signal observed for 3π (prelim. result)
- New upper limits for SM suppressed modes
- Waiting for Review committee approval to unblind CP asymmetries

Timetable

- Unblind CP asymmetries in 1-2 weeks (review committee)
- Show unblinded BFs and CP asymmetries at Dec. Collab. Meeting
- Started PRL draft. Get charmless AWG group to read it, then review committee.
- Collaboration circulation around time of Dec. Collab. Meeting?
